

## Security Analyst

**Function type:** Freelance - Vast      **Location:** Brussels  
**Duration:** long term      **Reference:** 202007946

### Description:

For a customer in the telecom sector, we are looking for a medior Security Analyst.

This person will be responsible for analysing the daily security of European customers' IT networks, using ArcSight as SIEM.

### Required Responsibilities:

- work in a team that monitors the security alarms of our external customers
- work with the internal CDC and exchange information on new threats and vulnerabilities
- responsible for front-line support during events and/or network or security incidents
- detect security problems and incidents, solve them and coordinate the resolution of complex incidents
- document all the incidents you handle in the ticketing system (CRM / CSS) and track the tickets
- consult the available sources of information to determine the characteristics of incidents
- make standardised changes to safety devices for our customers
- manage, optimize and keep up to date the documents of the clients
- prepare our customers' safety reports and provide additional data

### Requirements:

#### Degree & Experience

- bachelor's degree/industrial engineering training or equivalent experience
- experience with security vulnerabilities and related attacks
- work experience in a SOC is a plus
- experience in customer contacts and/or work for a technical helpdesk

#### Technical skills

- SIEM solutions (preferably HP ArcSight)
- ICT and IT protocols
- experience on security devices such as BlueCoat, Checkpoint, F5, Cisco (Pix-Firewalls), Netscreen VPN gateways
- having CCNA certificate or agree to obtain it
- safety level certificates or product certifications are a must

#### Attitudes/Behaviour

- take initiatives
- flexible ( Service Desk Coordination provides a 24/7 service. Working in shifts is essential)
- creative
- team player
- work with a structured approach while respecting guidelines

- oral and written communication skills
- integrity

#### Languages

- fluent in French, Dutch and English
- writing in your native language and in English

**Start:** 2020-03-15 23:00:00
